

Lovely, lovely fractions for parents!

12/06/2018

A relaxed, simple session about fractions to help you get to grips with the basics and revisit that knowledge you have tucked away from your own schooling! We will learn what fractions are, how to add and subtract them, how they relate to percentages and decimals. In 30 minutes you will be an expert...hopefully!

The session will be in Class 2 on **Monday 18th of June from 3.15-3.45pm.**

Pupils can stay and play on computers to help with child care. Biscuits available! Please let me know if you would like to attend as I will be lonely on my own!

Ms Praed

I _____ would like to attend the session.
